Editorial Index to Volume 212
January to December 1984

A
Annual Technical Review
Investment and technical achievements in Europe. Austria: Belgium: Bulgaria: Czechoslovakia: Denmark, 357.
Federal Republic of Germany: Finland: France, 359
German Democratic Republic: Greece, 363
Holland: Hungary: Ireland: Italy: Luxembourg: Norway: Poland: Portugal, 364
Romania: Spain: Sweden: Switzerland: Turkey, 366
United Kingdom: Yugoslavia, 368
Arbed — IMS pot carriers in Arbed (Mechanical Handling) 534
Automatic emission spectrometers (Quest for Quality), 478

B
Bar and section handling system commissioned at Allied's Cardiff mill, 339
Barlow to handle Baumann range of side loaders (Mechanical Handling), 535
Billet inspection at Brymbo Steelworks (Health and Safety feature), 219
BISPA Annual Review
Process of recovery will remain protracted and arduous by D W Ford, President BISPA, 95
A viable independent steel industry is essential by P W Lee, Past President BISPA, 96
Annual Report, 99
Some investment schemes completed or projected in 1983, 104
Companies in Membership, 107
Further developments at Tremorfa Steel Works, 107
British Bright Bar reorganisation, 109
Reversing fortunes at Rylands Whitecross: 110
Tinsley Wire begins £5M development: 110
Additional rolling capacity at C M Steels Ltd, 110
Major investment at Sheffield Forgemasters Ltd, 111
Arthur Lee restructuring begins to pay dividends, 111
Blast furnace dust — treatment of at Hoogovens (Health and Safety feature), 216
BNF Metals Technology Centre Research or Retreat (Research & Development), 35
Border Steel — Programmable control optimises energy consumption, 545
Brasway Tubes commissions new Midlands tube mill, 337
Bronx Process Engineering Ltd — new computerised multi sheet blanking line, 396
Bronx Engineering — Manufacturers of downstream process equipment, 427
Brymbo Steelworks — Billet inspection (Health and Safety feature), 219
BSC
Plant and practice modifications achieve energy savings at BSC Scunthorpe by Don Johnson, 152
Recent developments in energy conservation at BSC Teesside Works by W C Sedgwick, 157
Energy audits at BSC South Wales non-integrated works by Ieuan John, 162
Teesside tubes from BSC
Electric Weld linepipe from Hartlepool Mill, 221
Large diameter pipe from Stockton Works, 222
Quality tube from BSC's Midland works, 247
Quality fittings and finishing from Coombs Wood, 247
Bromford Works in market specialist, 249
Shotton's galvanising line — Work starts, 264
Training within the British Steel Corporation, 269
Developments in quality assurance for special steel production by J Barrett and M A Clarke (Quest for quality feature), 306
Pipe inspection at BSC Bromford Works (Quest for quality feature), 320
Developments at BSC Scunthorpe, 323
Scunthorpe Rod Mill — investing in the future, 378
BSC is committed to the end of subsidies and to maintaining supplies (NASS Conference), 392
Statistics of ingot mould performance by K B Wilford, F G Wilson and A Nicholson, 431
Improved burner efficiency on boilers used to provide steam for blast furnace turbo blowers at BSC Scunthorpe, 491
Computer Control for BSC Llanwern BOS, 491
Reducing wear on billet unscramblers at Cardiff Bar and Section Mills, 489
Microprocessor — based automation of rotary Crop Shear at Lackenby hot strip mill by MHB Pearson, 488
Port Talbot HSM development on target, 537
Upgraded Cranes at BSC Ravenscraig, 522

C
Certification Authority for Reinforcing Steels — CARES, (Quest for Quality feature), 303
Ceramic fibres in ladle lids and reheat furnaces by Paul Heathcote (Refractories feature), 66
Ceramic regenerative gas burners boost furnace efficiency, 593
C M Steels Ltd, additional rolling capacity (BISPA Annual Review), 110
Coil Coating '84, 170
Computer control for BSC Llanwern BOS, 491
Computer aided quality control (CAQC) for continuously cast slabs by T Fastner, H Bumberger, E Hackmack, H Kreulitsch, F Wallner and H Preissl (Quest for quality feature), 313
Computer assisted arc furnace steel making (Electric Arc Technology feature), 26
Computer-assisted Process control for LF/VD/VOD ladle metallurgy (secondary steelmaking), 470
Continuous annealing of steel strip (Downstream processes feature), 421

QUALITY & SERVICE

THE STEEL SERVICE CENTRE

Sheet and Plate Decoilers up to 2000mm × 6.4mm. A comprehensive range of stocks in Cold Reduced Hot Rolled and Electro Zinc Coated 0.7mm up to 6.4mm thickness.

MEMBER OF nass NATIONAL ASSOCIATION OF STEEL STOCKHOLDERS

JOHN TAINTON LIMITED

REGISTERED OFFICE & WAREHOUSE · THE STEEL SERVICE CENTRE
HOO FARM INDUSTRIAL ESTATE · WORCESTER ROAD · KIDDERMINSTER DY10 1HY
TELEPHONE KIDDERMINSTER (0562) 69911 · Telex: 336697

Continuous annealing lines — opportunities and disadvantages (Downstream processes), 492
Continuous casting tundish technology — a review by A V Parry and J H Courtenay (Refractories feature), 68
Continuous casting developments highlighted at Linz (Conference report), 265
Control cabin with improved visibility (Mechanical Handling feature), 522

D
The dc arc furnace — a new way to produce steel by Dipl-Ing H Essmann and Dipl-Ing D Grünberg (Electric Arc Technology feature), 13
DC arc furnaces for scrap melting, ferroalloy production or iron ore reduction (Electric Arc Technology feature), 20
Degassing unit - successful start-up at Lackenby, 254
Diesel driven ladle transfer cars (Mechanical handling feature), 525
Downstream processes
Product equipment and production of one-side hot dip galvanising by Tomihiro Haro, Shigeo Kanbara, Shuzo Fukuda, Masashi Onaka, Kenzi Kitagawa and Hiroyuki Hakamagi, 413
Growth in demand for electrolytically galvanised sheet, 418
Continuous annealing of steel strip, 421
Strip processing line developments, 425
Automatic rolled product conditioning lines, 425
Bronx Engineering-manufacturers of downstream process equipment, 427
Continuous annealing lines — opportunities and disadvantages, 492
Dry coke quenching at Tubarão iron and steel complex, 27

E
ECSC — collaborative steel research (Research and Development feature), 164
Edgar Vaughan — Helping the wheels turn smoothly, 38
Efficient energy burners developed by British Gas, 40
Electric Arc Technology
The dc arc furnace — a new way to produce steel by Dipl-Ing H Essmann and Dipl-Ing D Grünberg, 13
Plasma melting to replace arc furnaces at Voest-Alpine, 19
DC arc furnace for scrap melting, ferroalloy production or iron ore reduction, 20
Electric arc furnace with eccentric bottom tapping, 26
Computer assisted arc furnace steel making. Electroheat Conference, 26
Developments in electric arc furnace technology at Clecim, 23
Electroheat conference (Electric Arc Technology feature), 26
Electroheat in steel production, 592
Elevating transporters for palletised loads (Mechanical Handling feature), 535
Elkem a/s — Automatic surface inspection of billets, 318
Energy conservation — the role of in the steel industry, 36
Energy conservation
Energy use in the UK private steel industry by Peter J Roughley, 143
Strategy for energy use in the iron and steel industry, 147
Energy monitoring and targeting in the private steel sector by Dr C Hoskins, 148
Plant and practice modifications achieve energy savings at BSC Scunthorpe by Don Johnson, 152
Recent developments in energy conservation at BSC Teesside Works by W C Sedgwick, 157
Use of oxygen enrichment for steel reheating furnaces by G Boydell, A Felski, S Grainger and D P Jenkins, 160
Energy audits at BSC South Wales non-integrated works, by Ieuan John, 162
Use of covers to decrease heat losses in steelmaking by Sven Eketorp, 490
Engineering Steel by the SKF MR Process (Secondary steelmaking), 470
European File by Peter Wood
Scrutiny of French steel increases, 8
Special steels recovery impeded by quotas Advanced NDT, Hamburg Steelwork's future uncertain, Manpower reduction for French steel, 54
French Government rejects financing requests, 90
Union management offer different plans for restructuring VEW, 91
Quotas exceeded in order to survive, 140
Massive French Government aid will not save jobs, 188
Conflicting opinions continue on Gandrange universal mill, 240
Thyssen will reduce to 11Mt capacity over two years, 300
Production and sales rise as Cockerill-Sambre pushes ahead with restructuring, 352
FRG claim loss of share in EEC market, 410
SSAB rejects EEC dumping complaints, 410
Mannesmann tube picks up after poor 1983, 452
Steelmaking technologies in the Soviet Union, 453
German steelmakers propose penalties for subsidised steel after 1985, 508
Krupp Klöckney merger meets local political opposition, 572

F
The Flexible minimill
Programmable control optimises energy consumption at Border Steel, 545
First steel cast at Schlobin minimill, 551
The French iron and steel research institute (IRSID) (Research and Development), 259
Forklift truck — an integrated handling system (Mechanical Handling), 522
Furnace repair without downtime (Refractories feature), 64

H
Hartlepool Mill - electric weld linepipe, 221
Health and Safety
Managing health and safety in times of significant change by J A Catton, 209
The role and activities of the Steelmaking National Industry Group of the Health and Safety Executive by E M Whickham, 213
Treatment of blast furnace dust at Hoogovens, 216
Overhead crane and hoist safety, 219
Billet inspection at Brymbo Steelworks, 219
High strength and alloy steels
The future for alloy steels, by D Dulieu and T Gladman, 574
The production of high strength steel by H J Cortel, J C Dunnebier and R F Gadellaa, 583
New melting facilities for HSS and tool steel manufacturer; Alloy valve spring steel manufacture at SKF Steel, 586
Higher purity steel generate need for improved analysis (Quest for quality feature), 312
Hoogovens — Treatment of blast furnace dust. (Health and Safety feature), 216
Hoogovens — mechanised packing line for tinplate. (Mechanical Handling feature), 534
Hook conveyor system for rod and bar mills (Mechanical Handling feature), 534

I
Improved burner efficiency on boilers used to provide steam for blast furnace turbo blowers at BSC Scunthorpe, 491
IMS Lycrete: servicing the steel industry in the eighties, 122
IMS pot carriers in Arbed (Mechanical Handling feature), 534
Ingot mould performance — Statistics by K B Wilford, F G Wilson and A Nicholson, 431

K
Krupp. Ladle furnaces prove cost efficient at Siegen-Geisweid Works, 466

L
Lackenby degassing unit — successful start-up, 254
Ladle lining practice — techno economic considerations affecting by Dr M Peatfield (Refractories feature), 57
Ladle lining wear monitoring by laser (Refractories feature), 72
Ladle injection at Ovako Oy increases product range (Secondary steelmaking), 466
Ladle furnaces prove cost efficient at Krupp's Siegen-Geisweid Works. (Secondary steelmaking), 466
Ladle Metallurgy Plant for Von Roll. (Secondary steelmaking), 466
Ladle refining PM process for. (Secondary steelmaking), 469
Ladle furnace — Powder injection facility (Secondary steelmaking), 474
Ladle transfer cars — diesel driven (Mechanical handling), 525
Arthur Lee restructuring begins to pay dividends. (BISPA Annual Review), 111
Lee Steel Strip — A progress report, 74
Lifting equipment for the steel industry (Mechanical Handling), 527
Lifting gantry-used for SSAB blast furnace assembly (Mechanical Handling), 525

M
Magnet lifting applications — a review by D R D Taylor (Mechanical Handling feature), 529
Mechanical Handling
Trackless special vehicles in steel plants by Dr.-Ing Jürgen Kemme, 513
Automation of stockyard bulk materials handling, by means of PLC by G Frauböse, H A Kalscheuer, P M Mombour and W Klawitter, 519
The forklift truck — an integrated handling system, 522
Upgraded cranes at BSC Ravenscraig, 522
Control cabin with improved visibility, 522
Special lifting gantry used for SSAB blast furnace assembly, 525
Diesel driven ladle transfer cars, 525
Slag handling in the steelworks, 527
Lifting equipment for the steel industry, 527
Taranto steelworks acquires waste disposal unit, 527
A review of some magnet lifting applications by D R D Taylor, 529
Mechanised packing line for tinplate at Hoogovens, IMS pot carriers in Arbed, 534
Slab carrier system, 534
Hook conveyor system for rod and bar mills, 535
Barlow to handle Baumann range of sideloaders, 535
Specialised materials handling in steelmills, 535
Elevating transporters for palletised loads, 535
Melting Pot by Keith Gale
Continuous continuous — An iron puzzle — Reprospect and prospect, 44
Safety clothing — As others see us — It won't rust, 82
Quotas — Shortage of steel? — Read names with care, 127
The battle of the gauges — "He's at a meeting" — Iron for long life — Blueprints, 176
Walk round it - Steel and fashion - Another new — and necessary — term, Forklife limousines, 224
Coal and Steel — What — no Corrosion? —Is the customer always right? — Initials made easy, 287
Standards plus standards — What price conferences? — Busman's holiday, 342
A thin blast furnace — Thirty years of concast — The silly season, 382
Inspection? Control? Assurance? — The rise and fall of the open hearth — Steel in new technology, 439
Steel shrugs off punishment — Iron structures — Competition from within, 495
Thermal cycling — Alloys — Roll on IISI, 557
Ten year forecasts — Facts and fallacies — High speed communication — Steel on a volcano — Cathodic protection, 594
The Metals Society — The final annual meeting, 276
METEC 84 preview Preview of Exhibitors, 192
Microprocessor-based automation of rotary crop shear at Lackenby hot mill by M H B Pearson, 488
Multifrequency eddy current device — Crack-detection (Quest for Quality), 482

N
NASS Conference
Steel Stockholders meet in Harrogate, 385
BSC is committed to the end of subsidies and to maintaining supplies, 392
Overcapacity, prices and credit are the stockholders basic problems, 395

O
Overhead crane and hoist safety (Health and Safety feature), 219

Ovako Oy Ladle injection increases product range, 466
Oxygen enrichment, use of, for steel reheating furnaces by G Boydell, A Felski, S Grainger, and D P Jenkins (Energy conservation feature), 160
Oxygen steelmaking conference in Strasbourg, 374

P
Pearson Panke completes 30 years of UK representation, 281
Plasma melting to replace arc furnaces at Voest-Alpine. (Electric Arc Technology feature), 19
PM process for ladle refining, 469
Port Talbot HSM development on target, 537
Powder injection facility on Italian ladle furnace (Secondary steelmaking), 474
Productivity improvement with secondary steel refinement for small heats (Secondary steelmaking), 472
Purification system recycles pickling acid, 264

Q
Quality assurance through dynamic process control (Quest for quality), 482
Quest for Quality
Materials testing Exhibition 'MT '84', 113
Non-destructive testing by Dr R Halmshaw, 113
Exhibition Preview, 113
Quest for quality, 167
Quest for quality feature
Quality assurance in the UK steel industry — an overview by I M Mackenzie, 303
Developments in quality assurance for special steel production by J Barrett and M A Clarke, 306
Higher purity steels generate need for improved analysis, 312
BF runners at BSC Scunthorpe, 312
Computer-aided quality control (CAQC) for continuously cast slabs by T Fastner, H Bumberger, E Hackmack, H Kreulitsch, F Wallner and H Preissl, 313
Automatic surface inspection for billets, 318
Cleaner steel from new launder lining by M R Clarke, 319
Pipe inspection at BSC Bromford Works, 320
Steelmakers extend analysis to centralised process monitoring, 476
Analysis of trace elements in steel, 478
On-site analysis for rapid testing, 478
Automatic emission spectrometers, 478
Transducer for U/S inspection, 478
High performance spectrometer aid analysis, 480
Quality assurance through dynamic process control, 482
Crack detection using 'intelligent' multifrequency eddy current device, 482
New laboratory opens at Springfields, 482
Enemies of good surface quality sheet steel for consumer products by E E Michaelis, 486

R
Reducing wear on billet unscramblers at Cardiff Bar and Section Mills, 489
Refractories
Techno economic considerations affecting ladle lining practice by Dr M Peatfield, 57
Developments in steelmaking refractories by Peter Thompson, 61
Refractories research for the steel industry by Dr D Murfin, 63
Furnace repair without downtime, 64
Effects of rapid heating on blast furnace refractories by D Bell, F T Palin and G C Padgett, 65
Ceramic fibres in ladle lids and reheat furnaces, by Paul Heathcote, 66
A review of continuous casting tundish technology by A V Parry and J H Courtenay, 68
Ladle lining wear monitoring by laser, 72
Research and Development
Research or Retreat (BNF Metals Technology Centre), 35
Collaborative steel research in the ECSC, 164
The French iron and steel research institute (IRSID), 259
Retrofit construction poses problems for management and engineering by Morgan C Larkin, 32
Rod and bar mills - hook conveyor system (Mechanical handling feature), 534
Rolled product conditioning lines — automatic — (Downstream Procsses), 425
Roll grinding machines for SICARTSA, 253
Romania — Steel industry by Brian Cooper
Overall development of the steel industry, 76
Galati — integrated works, 78
Tirgoviste — special steels, 79
Pipe and Wire/wire product plants, 81
Rylands Whitecross, reversing fortunes at (BISPA Annual Review), 110

S
Schlobin minimill — first steel cast, 551
Secondary Steelmaking
Secondary Metallurgy in steel plants by Dipl-Ing Horst Rainer Pauls, 456
Ladle injection at Ovako Oy increases product range, 466
Ladle furnaces prove cost efficient at Krupp's Siegen-Geisweid Works, 466
Ladle Metallurgy plant for Von Roll, 466
PM process for ladle refining, 469
Computer-assisted process control for LF/VD/VOD ladle metallurgy, 470
Secondary metallurgy facilities from Standard Messo for the Belgian steel industry, 470
Engineering steel by the SKF MR process, 470
Technical developments in secondary metallurgy, 472
Productivity improvement with secondary steel refinement for small heats, 472
German supplier extends into secondary metallurgy, 472
Secondary steelmaking as the basis of modern metallurgy, 474
Powder injection facility on Italian ladle furnace, 474
Service Centre — Compiled by Philip Carden
Scottish Steel Stockholders' Association annual dinner: report, 45
Selling skills in stockholding, 47
Blue skies around which corner? Technical guide to stainless, 83
Deburring on RSA special purpose machines, 84
Brighter Stainless, 128
Steelmaker's comprehensive stockholding service, 177
Specialisation in metal sawing, 179
Three year survey of metal stockholding 'Director development' course for senior management, 228
Lilleshall to concentrate on steel stockholding, 229
Furnace repair technique installation, 231
Steel from stock the answer to many user's problems, 289
GKN seeking sales overseas, 290
New concept in CNC turning value, 291
Meeting the needs of the engineering steels buyer, 343
Handling consultants forms new design company, 345
New computerised multi sheet blanking line from Bronx Process Engineering Ltd., 396
The 'born again steel', 399
Bridle & Cross uses Hymo order picker at Wellingborough, 440
Increased product range from GKN Steelstock, 442
D F Bevan seeks new products, new markets, 496
Steel Testing for stockholders and others, 496
D & R invests in the future, 558
Sandvik boasts fast delivery of stainless steels in UK, 560
The house that John built, 596
Sheffield Forgemasters Ltd, major investment (BISPA Annual Review), 111
Sheffield Forgemasters completes restructuring, 371
SICARTSA - Roll grinding machines, 253
Silo collapse — minimising the risk, 275
SKF MR process — engineering steel (Secondary steelmaking), 470
Slab carrier system (Mechanical Handling feature) 534
Slag handling in the steelworks, 527
Spanish Industry Profile, 587
Special steel production — developments in quality assurance by J Barrett and M A Clarke (Quest for Quality feature), 306
Spectrometer aid analysis — high performance (Quest for quality), 480
SSAB — Special lifting gantry used for SSAB blast furnace assembly, (Mechanical handling), 525
Standard Messo secondary metallurgy facilities for the Belgian steel industry. (Secondary steelmaking feature), 470
Statistics of ingot mould performance by K B Wilford, F G Wilson and A Nicholson, 431
Steelmaking National Industry Group of the Health and Safety Executive — The role and activities By E M Wickham (Health and Safety feature), 213
Steelmaking refractories — developments in by Peter Thompson (Refractories feature), 61
Stockton Works — Large diameter pipe from, 222
The strategy for steel in Europe. 32nd Hatfield Memorial Lecture, 437
Strip processing line developments (Downstream processes), 425
The Sulmag process for the production of high-purity sintered magnesite, 275

T
Taranto Steelworks acquires waste disposal unit (Mechanical Handling feature), 527
Technical developments in secondary metallurgy (Secondary steelmaking), 472
Techno economic considerations affecting ladle lining practice by Dr M Peatfield (Refractories feature), 57
Teesside tubes from BSC, 221
Tinning line — Europe's most advanced commissioned in Yugoslavia, 28
Tinsley Wire begins £5M investment (BISPA Annual Review), 110
Trace elements — analysis of in steel (Quest for Quality), 478
Trackless special vehicles in steel plants by Dr.-Ing Jürgen Kemme, 513
Transducer for U/S inspection (Quest for Quality), 478
Tremorfa Steel Works, further developments (BISPA Annual Review), 107
Tubarão iron and steel complex — dry coke quenching, 27
Teesside tubes from BSC, 221
Electric weld linepipe from Hartlepool Mill, Large diameter pipe from Stockton Works, 222

Y
Yugoslavia — Europe's most advanced tinning line commissioned, 28
